LinkedIn Profile: www.linkedin.com/in/nur-fatihah-maisarah-salto

Summary

Computer Science graduate specializing in Netcentric Computing and recent Full-Stack AI Coding Bootcamp alumnus. Hands-on experience developing secure, data-driven web applications using core PHP, Laravel, and MySQL during public sector industrial training. Adaptable developer eager to apply foundational software engineering and database design skills within a collaborative development team.

Professional Experience

JABATAN TEKNOLOGI DIGITAL DAN INOVASI NEGERI SABAH Kota Kinabalu, Sabah
Industrial Training September 2025 – December 2025

- Developed a scalable government web application using core PHP and MySQL, modernizing legacy systems to support high-volume administrative data.
- Strengthened application security using CSRF protection and SQL prepared statements, and engineered automated PDF reporting to reduce manual preparation time by 40%.
- Collaborated with an internship supervisor to design status dashboards and digital workflows, resulting in a 25% improvement in processing speed.

Education

GAMUDA AI ACADEMY Kota Kinabalu, Sabah
Full-Stack AI Coding Bootcamp May 2026

UNIVERSITI TEKNOLOGI MARA (UITM) Jasin, Melaka
Bachelor of Computer Science (Hons.) Netcentric Computing | CGPA: 3.25 October 2022
- Dean's List Academic Achievement Award recipient

UNIVERSITI TEKNOLOGI MARA (UITM) Kota Samarahan, Sarawak
Diploma in Applied Science | CGPA: 3.45 October 2019
- Dean's List Academic Achievement Award recipient

Projects

DailyDose – Medicine Reminder System
Technologies: Laravel, PHP, MySQL, HTML, CSS, JavaScript, Bootstrap
- Developed a full-stack web application using Laravel (MVC) and MySQL. Implemented secure user authentication, CRUD medication management, and a responsive Bootstrap UI, ensuring 100% reliability in reminder scheduling through rigorous testing.

AiEDESWatch – AI-Powered Dengue Outbreak Prediction Platform
Technologies: React (Vite), Tailwind CSS, Python (FastAPI), XGBoost, Supabase (PostgreSQL), Leaflet.js
- Engineered a full-stack predictive surveillance system using XGBoost to forecast dengue hotspots with a 14-day to 2-month lead time, utilizing environmental and spatiotemporal variables.
- Developed an interactive spatiotemporal risk map using Leaflet.js and React, providing hyperlocal data visualization for health officers to prioritize high-risk zones.
- Architected a scalable backend with FastAPI and Supabase, implementing automated risk profiling and a WhatsApp/SMS alert network to facilitate rapid community response and preventive action.

Skills

Programming Languages: PHP, Java, Python, JavaScript, C++, Dart
Web & Frameworks: HTML5, CSS, Tailwind, React.js, Bootstrap, Laravel, jQuery
Mobile Development: Flutter, Android Studio
Databases: MySQL, SQL, Firebase, MongoDB, PostgreSQL
Design & Editing: Figma, Canva, Clip Studio Paint, Photoshop, Adobe Premiere, Capcut
Version Control: Git, GitHub
Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Technical Communication, Adaptability, Attention to Detail

Languages

English, Malay, Japanese (JLPT N4)

Certificates

- CCNAv7: Introduction to Networks
- Japanese-Language Proficiency Test (JLPT) N4
- MUET Band 4.5 (2021)
- Certification of Completion: Python or Everyone

Co-Curricular Activities

Member of Netcentric Club 2022 - 2026

Additional

Student Scholarship Recipient (BKNS), 2019 – 2026
